

## Flood Sensor (Spot)

Monitor specific locations in your facility to be notified of water leaks in real-time.

RMA-FS2-SEN

### We've got facilities covered.

Monitor specific locations in your facility for water leaks with the Flood Sensor (Spot) from AVTECH. This battery-powered sensor connects to Room Alert as a switch sensor and is designed to trigger alerts as soon as it is activated by water or any other liquid. Place near drains, in basements, near problem areas in your facility that are prone to leaks and more. For more information and specifications, please visit [AVTECH.com](http://AVTECH.com).
